

Meeting November 12, 2025  
5:00 - 5:15

Max:

Worked on getting the API working and a save button for saving locations. Will work on the feed in the upcoming week.

Seb:

Worked on the autocomplete for the search bar and started working on uploading images for posts. Will work on finishing up the uploading feature this week.

Brody:

Worked on creating the search bar on the home page to search for a location's weather instead of just using the current location. Worked on a boilerplate for the profile page. Next week will finish the profile page and figure out what we will do for the post page (if we need it).
